

GOING FURTHER... FASTER

LeanSigma[®] for Process Industries

A TBM LeanSigma Institute workshop

A senior-level overview for process manufacturers of a proven business strategy for rapidly achieving dramatic performance improvement.

Generating rapid, sustainable business improvement

Discover the dramatic impact that Lean and Six Sigma, implemented in unison, can have in a process environment

WHAT YOU WILL LEARN

- **Your company's improvement potential – and a proven business strategy to quickly drive substantial improvement and efficiency across your entire value stream**
- **How to seamlessly integrate Lean and Six Sigma into a cohesive, enterprise-wide improvement initiative**
- **How you can rapidly improve process yield with Sigma Kaizen events**
- **How you can dramatically improve process capability and equipment effectiveness, without significant capital investment**
- **How you can rapidly reduce changeover and clean-out times by 75-90%**
- **How you can achieve major productivity improvement by increasing throughput**
- **How you can improve process flexibility to deliver to actual customer demand, with reduced lead times and inventory**
- **Your own transformation roadmap, including long-term objectives, project sequence and anticipated results**
- **The necessary skills and tools to encourage greater associate involvement and process ownership – and create and sustain a culture of continuous improvement**

“Speed is the name of the game.

Our LeanSigma transformation has intensely motivated our people and created an understanding of real teamwork. In less than a year, we have generated 4X ROI from increased throughput and yield improvement.”

MAJOR INTERNATIONAL BEVERAGE PRODUCER

LeanSigma® for Process Industries

A two-day workshop from the
TBM LeanSigma Institute

**See how Lean and Six Sigma,
together in a coordinated initiative,
can help you achieve substantial new efficiencies
and sustained revenue and profit growth.**

THE IMPACT OF LEANSIGMA

WHO SHOULD ATTEND

Senior management teams including CEO, President, COO, CFO; General Manager; VPs or Directors of Marketing, Operations, Engineering, Continuous Improvement, Quality, Materials and Human Resources

"We're using LeanSigma to improve all our processes, which allows us to build stronger customer relationships, launch numerous new products and achieve major reductions in production costs."

T.J. JOHNSON, VICE PRESIDENT
OF CORPORATE DEVELOPMENT
AND OPERATIONS, VENTANA
MEDICAL SYSTEMS

LeanSigma, pioneered by TBM, is today's fastest and most effective approach to business improvement. By combining the rapid waste elimination and lead-time reduction of Lean with Six Sigma's focus on quality and yield improvement, LeanSigma gives process manufacturers an unprecedented, one-two improvement punch – in a fraction of the time of standalone Six Sigma.

If you are struggling to achieve breakthrough improvement, are uncertain about which improvement approach to adopt – or are relying on traditional Six Sigma to move the dials, we invite you to experience the dramatic speed and impact of LeanSigma.

Higher Quality

- Improved process yield, process capability and waste reduction

Increased Flexibility

- Reduced set-up and clean-out times – with the ability to match production to actual demand, by running smaller batches and more SKU's each day

Lower Cost

- Increased throughput, first-pass yield, machine effectiveness and asset utilization

Improved Cash Flow

- Less inventory in storage and in the pipeline, streamlined distribution – and the eventual elimination of capacity-related capital expenditures

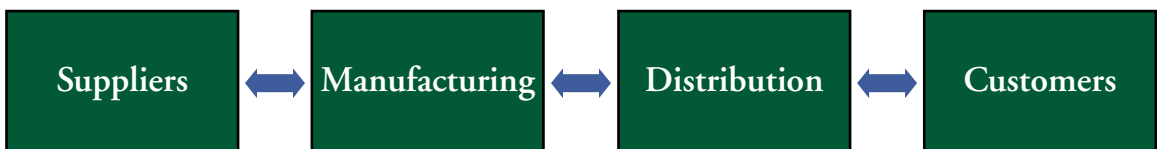

LeanSigma is being used today to drive game-changing competitive advantages for process industries across the globe. This workshop will demonstrate how you can do the same, faster than ever before possible – and leverage this impact throughout your value stream. We invite you to join us for these two days of insight and direction.

RAISING THE BAR

There is little room for error in today's economic environment. Every business knows they need to elevate performance – to boost sales levels, profit margins and market share, improve productivity and lower costs. For long-term survival, those are the minimum requirements.

LeanSigma® enables speed and employee involvement to drive significant business improvement. By combining the tools of Lean and Six Sigma with Kaizen methodology, you can realize the potential of truly superior performance – sustainable growth, lucrative new markets and new competitive advantages.

See how you, with little or no capital investment, can eliminate wasted time, effort and material across your entire value stream – dramatically compressing lead times and reducing costs.

“We needed to improve much faster. LeanSigma gave us the roadmap for rapid improvement – and the enthusiasm to jumpstart our efforts.”

DAVE CONROW, GROUP VICE PRESIDENT, KAISER ALUMINUM

“Speed and flexibility are huge competitive advantages. We’ve made big reductions in changeover times, so we can make more SKUs every day – and deliver faster to our customers.”

MAJOR INTERNATIONAL TIRE MANUFACTURER

THE PAYOFF

See how LeanSigma® can help your business start generating continuous growth, profit and market share gains, with minimal capital input.

- Drive sales growth at three-five times your industry average
- Grow profits at twice your industry average
- Reduce lead times to 1/2-1/4 your industry average
- Increase inventory turns to 24 or more
- Produce and deliver products and services faster than your competitors
- Improve the efficiency of your supplier and distribution networks
- Increase your responsiveness, market share and customer loyalty
- Sustain and build new competitive advantages
- Improve value for employees, business partners, customers and shareholders

UNCONDITIONAL GUARANTEE

TBM guarantees 100% satisfaction. If, for any reason, you are not satisfied with a TBM LeanSigma® Institute workshop, we will refund 100% of your fee.

Discover how you can begin realizing these dramatic results. Register for our next “LeanSigma for Process Industries” workshop.
