About TBM

Speed wins every time.

TBM specialises in operations and supply chain consulting for manufacturers and distributors. We accelerate operational performance to make you more agile and help you accelerate business performance 3–5x faster than your peers.

Challenge

- Quality issues arising in new products
 - Lack of statistical discipline within the R&D organisation
 - Process inefficiencies associated with having several different quality standards
- The new product introduction process (NPI) hampering the introduction of new products
- Sub-optimal lab structure to support R&D projects

Solution

- Worldwide assessment of the beverage quality assurance organisations and core practises
- Customised Greenbelt / Blackbelt training to improve the NPI process
- Mapped current and future state core ingredient release process to volume production including formula development, manufacturing, equipment design, packaging, measurement and traceability systems
- Implemented pull system in lab work flow and eliminated physical and process wastes

Results

- Single, universal quality system implemented following worldwide assessment of beverage quality assurance organisation and its core practises
- \$50MM estimated financial benefit from Green Belt/Black Belt projects
- 25-50% liberation of R&D lab space
- 25-30% improvement in lab productivity
- Client adopted and implemented batching process recommendations
