

Management System + Operational Leadership

DO MORE THAN SET GOALS. EXCEED THEM FASTER.

A comprehensive management system translates strategic vision and annual objectives into a connected operations system that is understood and implemented organization-wide. Our framework drives behavioral change focused on problem solving, speed and execution by engaging all levels of the organization. And it quickly begins driving sustainable performance improvements up to 15%.

Does your organization struggle to:

- Connect big picture strategy to day-to-day goals and objectives
- Consistently meet performance goals
- Solve problems and keep them fixed
- Align improvement priorities and resources around strategic objectives
- Focus the team on a common set of business-critical metrics

With the TBM Management System, you will:

- Create a consistent management process across your entire enterprise
- Improve executional effectiveness and speed
- Know what daily work to do and what to measure to stay on track and move toward your strategic vision
- Get out of fire-fighting mode and focus on problem solving
- Realize sustainable, breakthrough performance improvement up to 15% in addition to other physical improvements

Translate your strategic vision for breakthrough performance into executable plans with achievable daily milestones.

STRATEGY DEPLOYMENT

TBM helps you develop 3-5 year breakthrough goals and translate them into annual objectives with measurable targets and actionable plans. Using time-proven process discipline and monthly reviews, you will increase your likelihood of successfully implementing your strategy.

GOAL DEPLOYMENT

We help you do more than communicate and cascade high-level goals. We give you a detailed improvement roadmap with meaningful targets for every level, from front line employees up through middle management.

OPERATIONAL LEADERSHIP DEVELOPMENT

We make your leaders the engine behind your management system by teaching them to use a structured approach to drive daily improvement. Metrics are aligned, accountability is clear, and problem-solving skills are rooted in organizational behavior.

DAILY MANAGEMENT PROCESS

Establish the rigor and discipline needed for setting goals, measuring progress, indentifying misses and root causes, and course correcting on a daily basis. So you can win the day, the week, the month, and ultimately the year.

DPLOY SOLUTIONS SUITE OF OPERATIONAL EXCELLENCE TOOLS

Designed to work hand-in-hand with the TBM Management System, Dploy Solutions software automates process rigor to support and streamline daily management, strategy deployment, KPI management, project management, and data visualization.

TBM's accelerated approach drives rapid results.

At TBM, we work in hours, days, and weeks to get your Management System in place in the shortest timeframe possible. By working with your team at the point of impact and addressing your biggest opportunities for improvement first, we can go from system design to implementation in a matter of weeks. And your business can begin benefitting from performance improvements almost immediately.

Establishing your TBM Management System

Seasoned consultants tour your facility and ask the right questions to understand your situation and quickly hone in on your biggest challenges and opportunities for improvement.

We work collaboratively with your team to customize your Management System to your specific challenges and operating environment. You get a system you can own, and that your people will use.

TBM works quickly to get the framework of your Management System in place within weeks, including visual management solutions for performance tracking and the Dploy Solutions suite of operational excellence tools to enable your system.

Demonstrations, hands-on coaching, and rigorous review sessions ensure your people know how to leverage your Management System for problem solving and driving ongoing improvement.
